STALLFLOW

Staff guide
Duxie's Homemade

Step by step: running the till on market day, and keeping stock, recipes and the numbers up to date.

Part 1 · Cashier

Sign in, choose your market, sell, take payment and hand over pre-orders.

Part 2 · Manager

Cook a pot, stock and prices, the cupboard, market numbers and people.

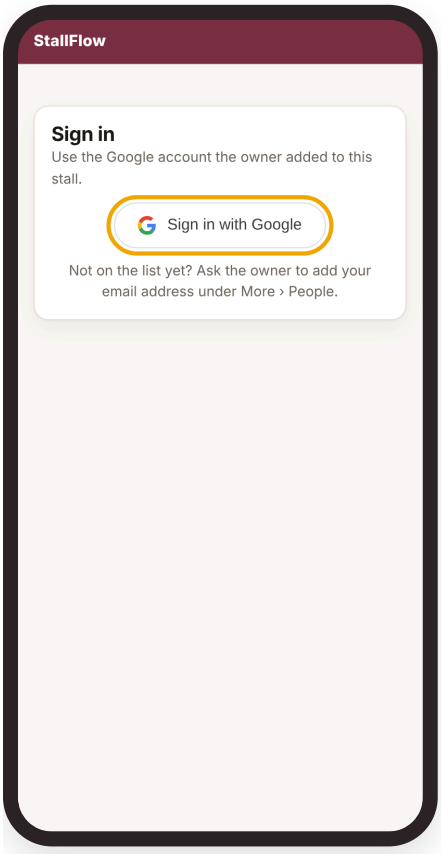

Staff app: stallflow.github.io/Stallflow/duxies/app · Edition: October 2026

PART 1

The till: for cashiers

Everything a salesperson needs on market day. Eleven steps, in the order you will use them.

The yellow box in each picture shows where to look or tap.

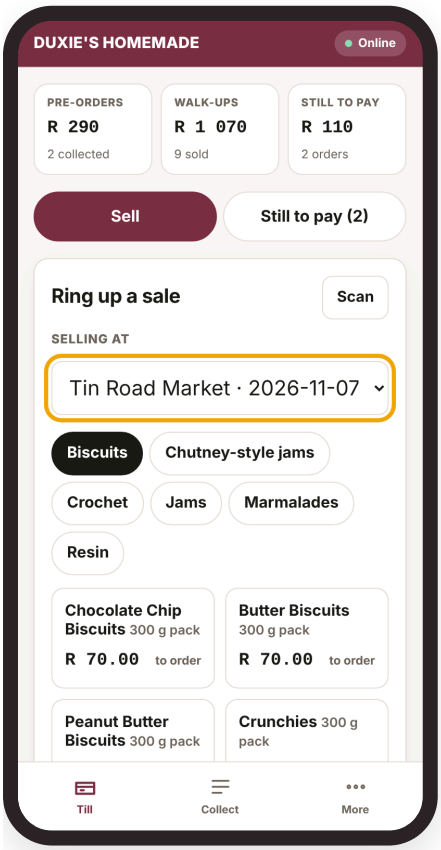

CASHIER · STEP 1

Sign in

1. Open the staff app on your phone: **stallflow.github.io/Stallflow/duxies/app**
2. Tap **Sign in with Google** and choose your own Google account.
3. If it says you are not on the list, ask Marian to add your email under **More › People**.

> Tip: add the app to your home screen (browser menu › *Add to Home screen*). It then opens like any other app and works without signal.

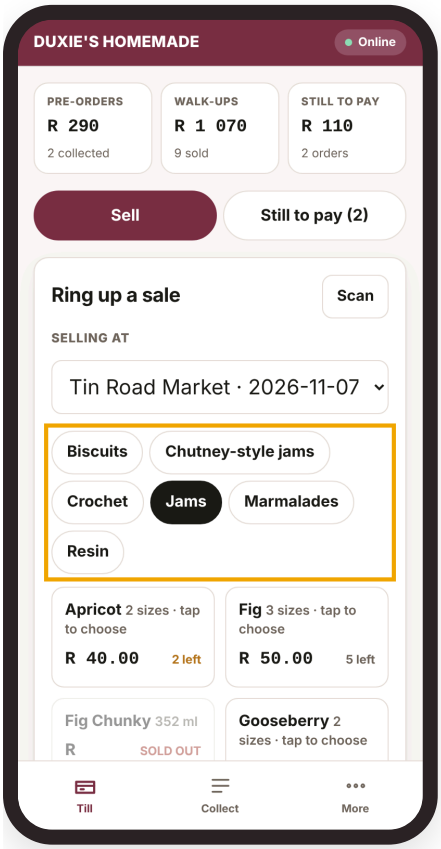

CASHIER · STEP 2

Choose the market you are at

1. Open **Till** at the bottom of the screen.
2. Under **Selling at**, pick the market you are standing at today.
3. Your phone remembers it. Only change it if you move to a different market.

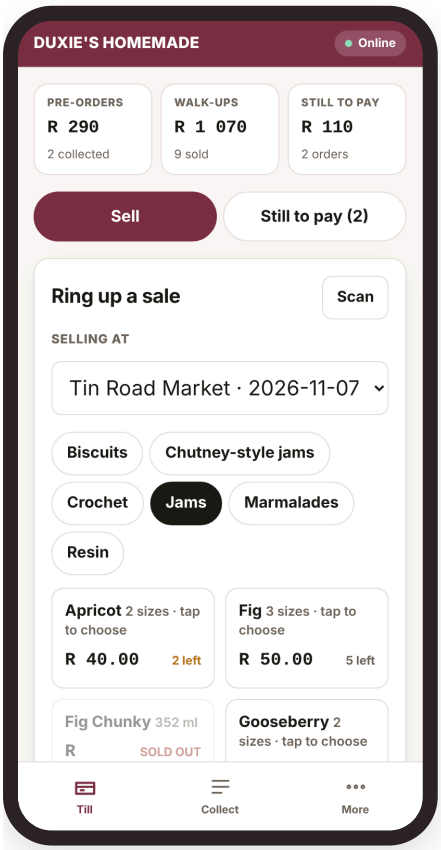

> Up to three markets can run on the same day. Choosing the right one keeps each market's takings apart.

CASHIER · STEP 3

Pick the type

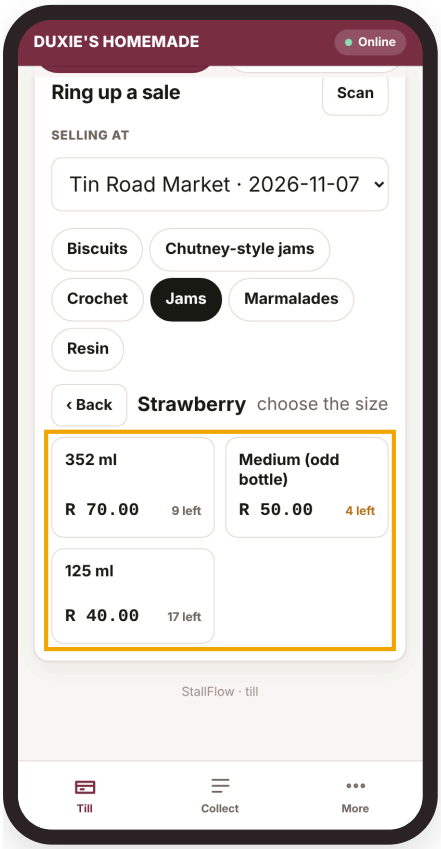

1. Tap the type the customer wants: **Jams**, **Marmalades**, **Biscuits**, **Crochet** and so on.
2. The black button is the type you are looking at.

CASHIER · STEP 4

Pick the product

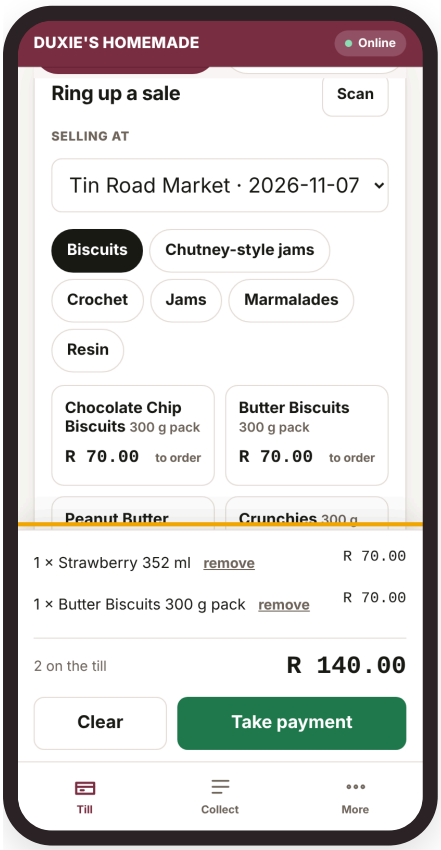

1. Tap the product, for example **Strawberry**.
2. Each button shows the price and how many are left. **SOLD OUT** items cannot be tapped.
3. A product with one size goes straight onto the bill.

CASHIER · STEP 5

Pick the size

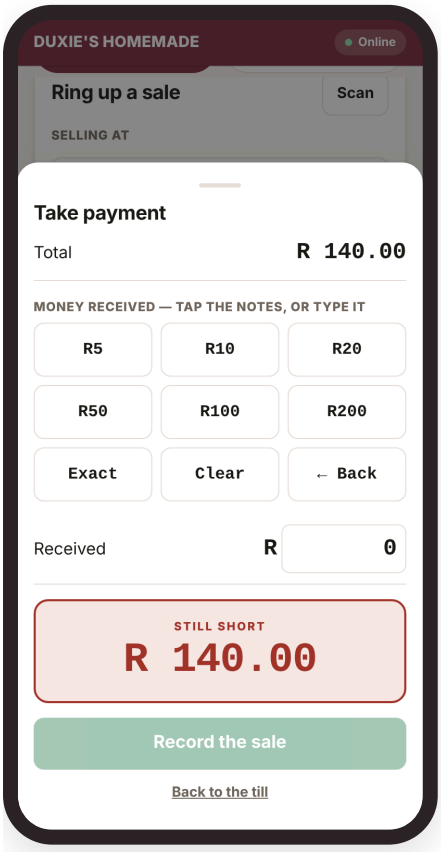

1. Tap the size: **352 ml**, **Medium** or **125 ml**.
2. It is added to the bill and the screen goes back to the products for the next item.
3. Tap **‹ Back** if you chose the wrong product.

CASHIER · STEP 6

Check the bill

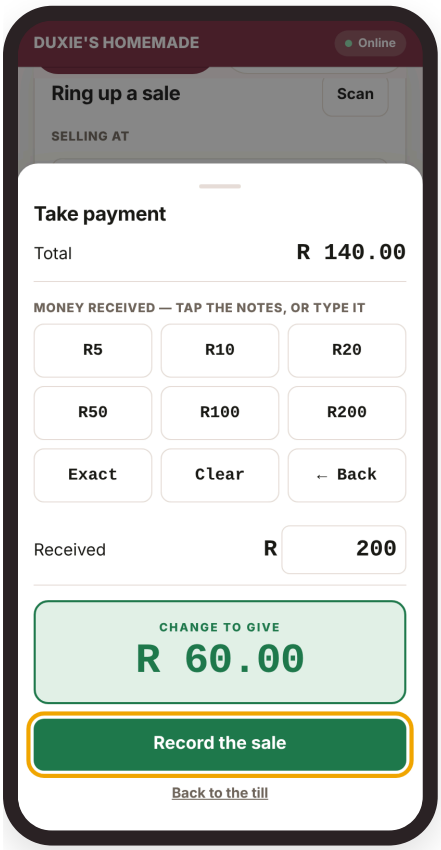

1. The bill appears at the bottom. Each line shows the product and size.
2. Tap **remove** to take a line off, or **Clear** to start again.
3. When everything is on, tap **Take payment**.

CASHIER · STEP 7

Take the money

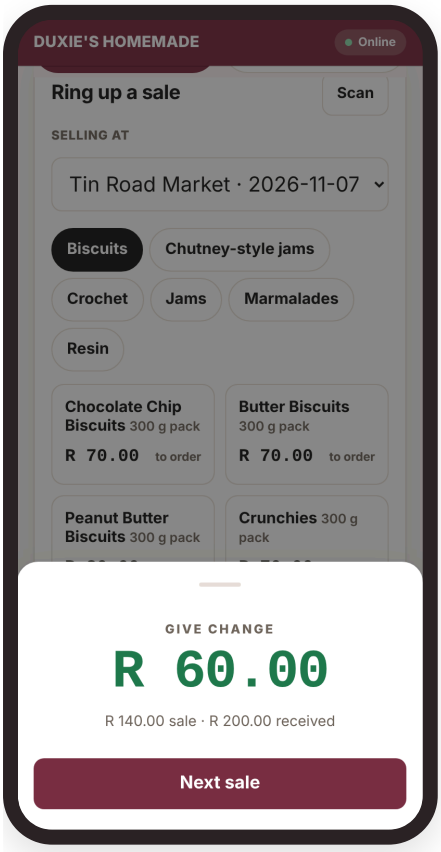

1. Tap the notes and coins the customer hands you, for example **R200**.
2. Or tap **Exact** if they paid the exact amount.
3. Made a mistake? Tap **← Back** to undo the last note.

CASHIER · STEP 8

Give change

1. The green box shows the **change to give**.
2. Tap **Record the sale**.
3. The button stays grey until enough money has been entered.

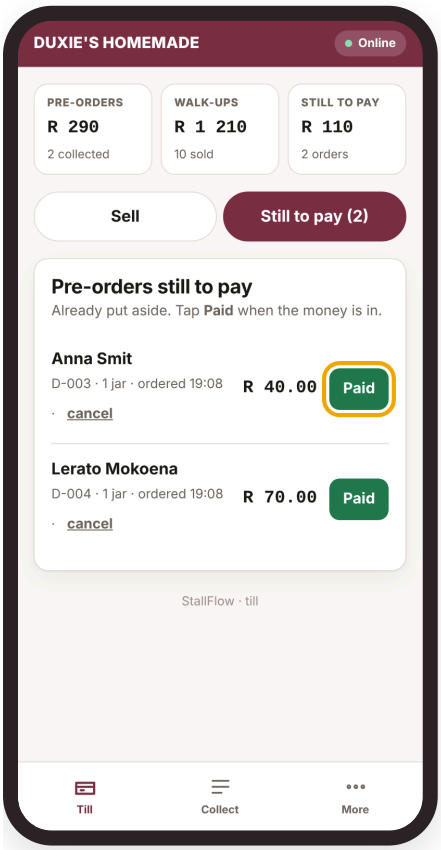

CASHIER · STEP 9

Next customer

1. The change is shown big once more, so you can count it out.
2. Tap **Next sale** for the next customer.

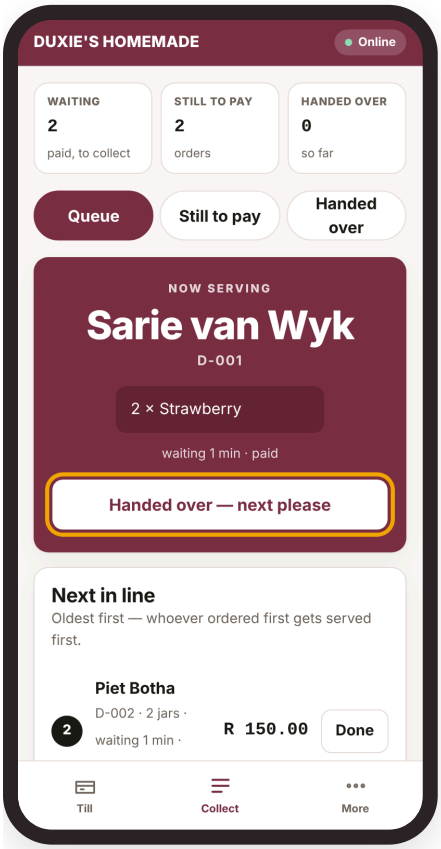

> No signal? Keep selling. Sales are kept on the phone and sent automatically when signal comes back.

CASHIER · STEP 10

Pre-orders that still need to pay

1. Tap the **Still to pay** tab at the top.
2. When the customer pays, tap the green **Paid** next to their name.
3. They then move to the collection queue.

CASHIER · STEP 11

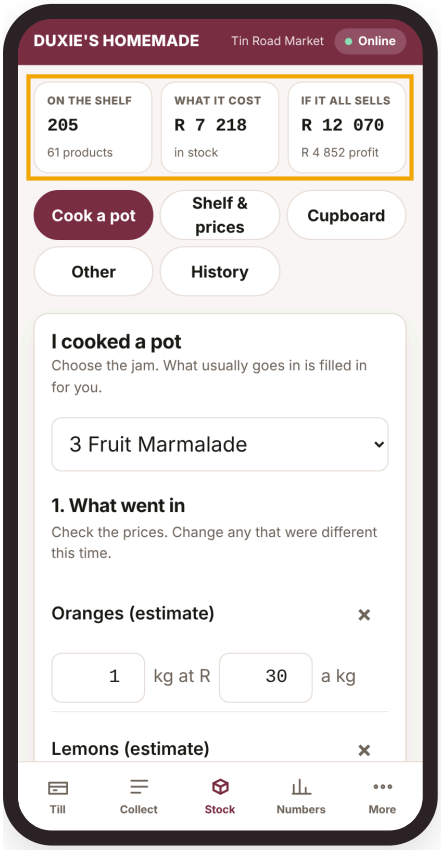

Hand over pre-orders

1. Open **Collect** at the bottom.
2. **Now serving** shows who is next and exactly what to hand over.
3. Give them their order and tap **Handed over — next please**.

PART 2

Stock and numbers: for managers

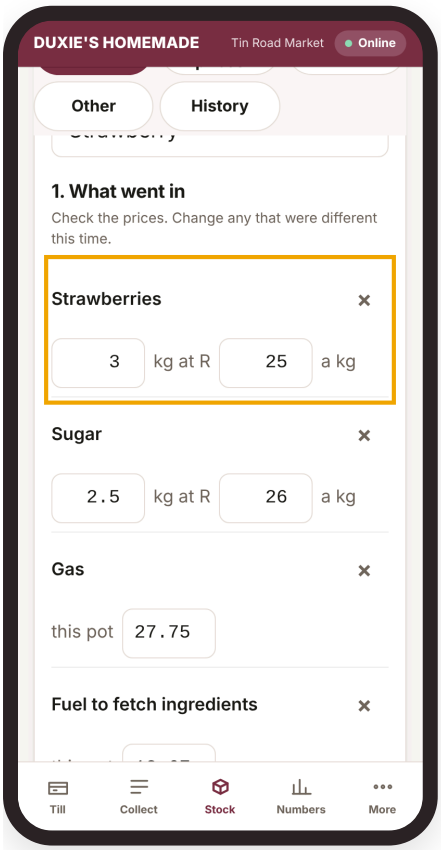

Recording what you cook, keeping prices and the cupboard right, and seeing how each market did.

MANAGER · STEP 1

The Stock screen

1. Open **Stock**. The three boxes at the top always show:
2. **On the shelf**: jars ready to sell. **What it cost**: what that stock cost to make. **If it all sells**: the takings, with the profit underneath.
3. Use the tabs to move between **Cook a pot**, **Shelf & prices**, **Cupboard**, **Other** and **History**.

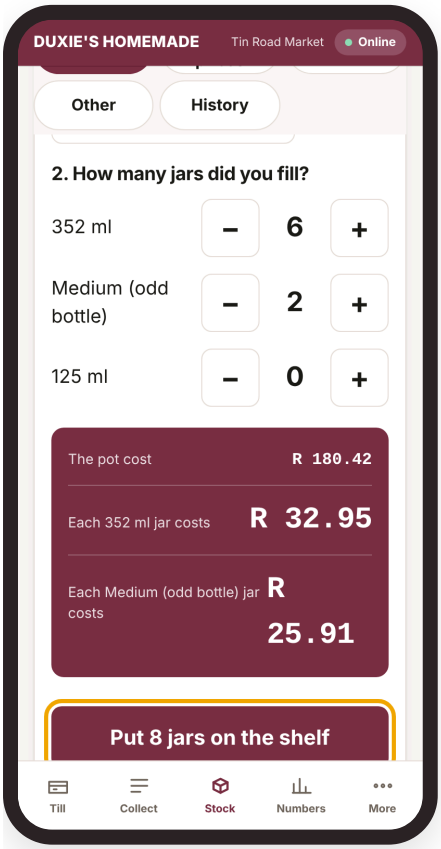

MANAGER · STEP 2

Cook a pot: what went in

1. On **Cook a pot**, choose the jam.
2. The usual recipe fills itself in: fruit, sugar, gas and fuel.
3. Change a price if you paid something different this time. Tap **×** to take an ingredient out, or **+ Add an ingredient**.
4. Tap **Save as the usual recipe** to keep the change for next time.

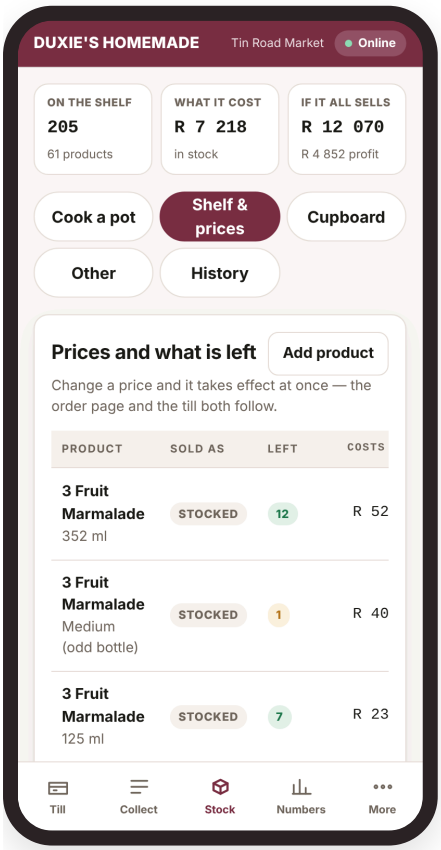

> New jam? Choose **+ A new jam…** in the list, fill in one pot and save. It is added to the shelf as 352 ml at R70 and 125 ml at R40.

MANAGER · STEP 3

Cook a pot: count the jars

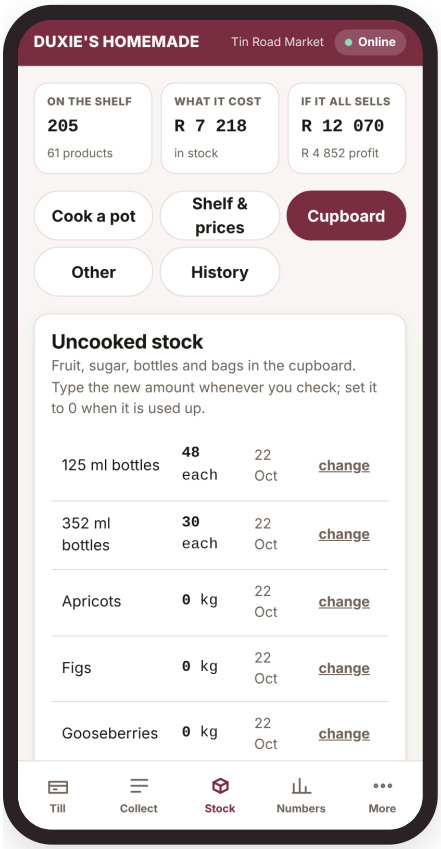

1. Tap **+** and **–** for how many jars of each size you filled.
2. The red box shows what each jar cost you.
3. Tap **Put … jars on the shelf**. The jars go into stock, and the fruit, sugar and bottles come off the Cupboard.

MANAGER · STEP 4

Shelf & prices

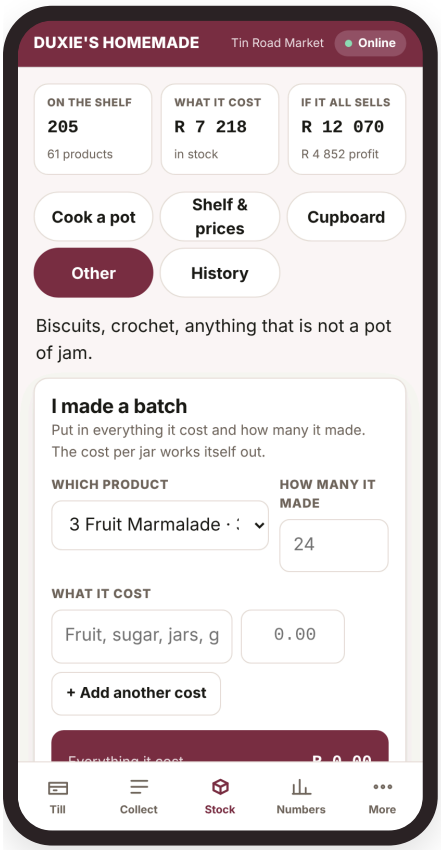

1. Every product with how many are left, what it costs you and what it sells for.
2. Tap a price to change it. The till and the order page follow at once.
3. **adjust** corrects a count (a broken jar, a gift). **hide** takes a product off the till.

MANAGER · STEP 5

Cupboard (uncooked stock)

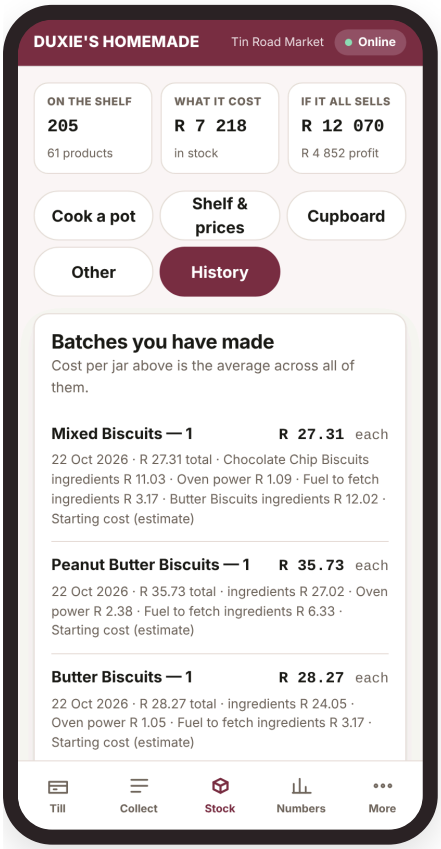

1. Fruit, sugar, empty bottles and bags waiting to be cooked.
2. Tap **change**, type the new amount and **Save**. Set it to 0 when it is used up.
3. Cooking a pot takes what it used off here automatically.

MANAGER · STEP 6

Other: biscuits, crochet, resin

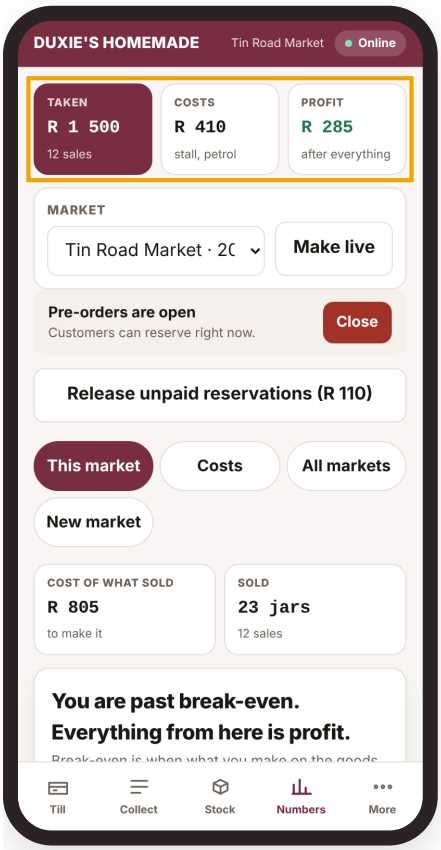

1. For anything that is not a pot of jam.
2. Choose the product, how many it made, and type what it cost.
3. Tap **Add this batch**. The cost per item works itself out.

MANAGER · STEP 7

History

1. Every batch and pot you have recorded, newest first, with the cost of each item.
2. The cost shown on Shelf & prices is the average across all of them.

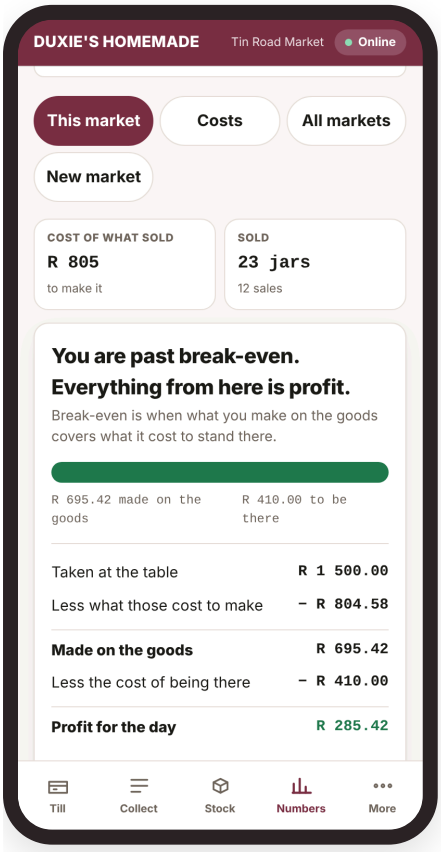

MANAGER · STEP 8

Numbers: the market at a glance

1. Open **Numbers**. The top boxes show what was **taken**, the **costs** of being there, and the **profit**.
2. Choose a market in the list to see its figures.
3. **Make live** sets the market the order page takes pre-orders for. **Close** stops pre-orders.

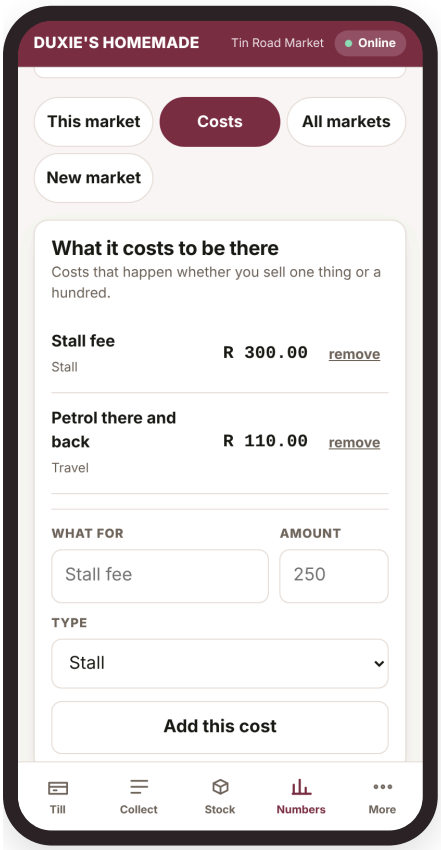

> Sales made at home or over WhatsApp are under **Sales between markets** in the list.

MANAGER · STEP 9

This market

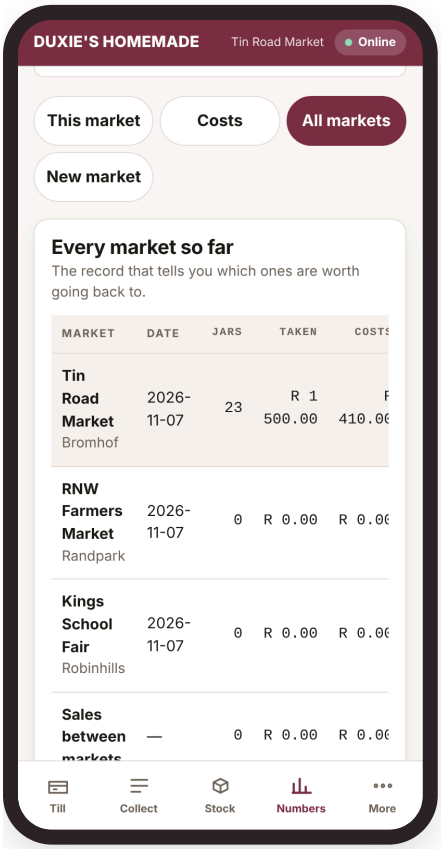

1. Shows the sales, what they cost to make, and whether the day has covered its costs (break-even).
2. Further down: what sold best, by what it brought in.

MANAGER · STEP 10

Costs

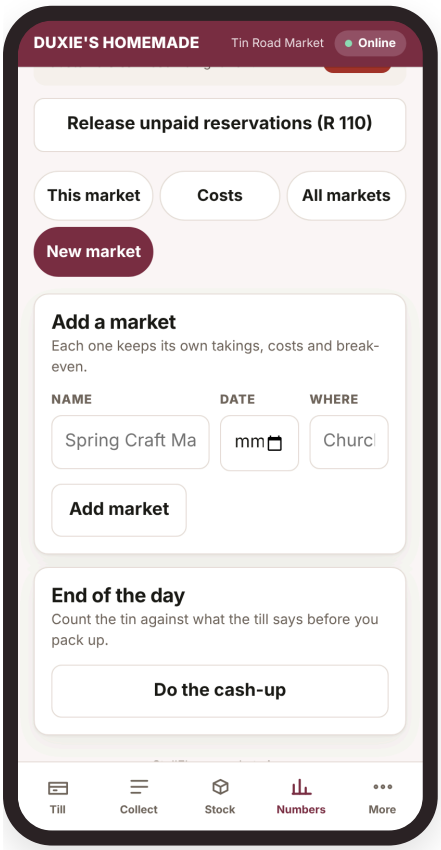

1. Add what it costs to be at the market: stall fee, petrol, a gazebo.
2. Type what for and the amount, choose the type, and tap **Add this cost**.

MANAGER · STEP 11

All markets

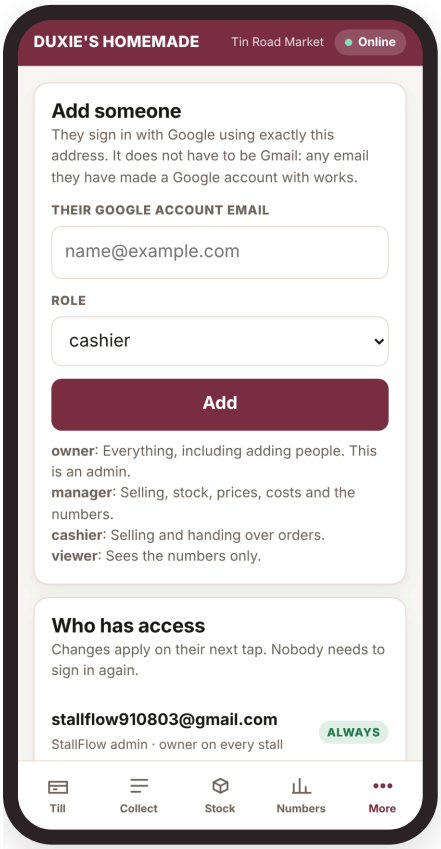

1. Every market side by side: jars sold, takings, costs and profit.
2. Use it to decide which markets are worth going back to.

MANAGER · STEP 12

New market

1. Type the name, date and place, then tap **Add market**.
2. For three markets on one day, add all three with the same date. Salespeople then choose theirs under **Selling at** on the Till.

MANAGER · STEP 13

People: who can use the app

1. Open **More › People** (owner only).
2. Type the person's Google email, choose a role and tap **Add**.
3. **cashier**: sells and hands over orders. **manager**: also stock, prices and costs. **owner**: everything, including adding people.
4. Switch someone off and they are locked out on their next tap.

Quick reference

Before every market

- Phone charged, app opened once with signal.
- Till › **Selling at** set to today's market.
- Stock › **Shelf & prices**: counts look right.
- Numbers: the market is added, and **Make live** if it takes pre-orders.
- Costs: stall fee and petrol added.

During the market

- Type › product › size › **Take payment**.
- Tap the notes received, give the change shown.
- Pre-order pays: **Still to pay** › **Paid**.
- Pre-order collects: **Collect** › **Handed over**.
- No signal: keep selling, it catches up later.

After cooking

- Stock › **Cook a pot**: jam, check prices, count jars.
- Biscuits and crafts: Stock › **Other**.
- Bought fruit or sugar: Stock › **Cupboard**.

Something not right?

- Screen looks old: close the app and open it again.
- "Not on the list": the owner adds you under More › People.
- Still stuck: send Jacques a screenshot on WhatsApp.
